 Enugu, Nigeria

Summary

Python Web Developer specializing in **React.js and Django**, with a **HND. in Chemical Engineering**.

Proficient in building responsive, user-friendly web applications with focus on clean code and efficient workflows. Passionate about learning new technologies and improving development skills, combining analytical problem-solving skills from my science background with web development expertise.

Skills

- **Front-End:** React.js, HTML, CSS, JavaScript
- **Back-End:** Django, Python, Database Management
- **Other:** UI/UX Designs, Responsive Design, Full-Stack Development, Git

Projects

- **[Mimi's Kitchen Kouture]**

[A simple responsive site built with html, css and javascript that showcases different varieties of modern kitchens]. [Live Demo](#)

- **[Food-app]**

[A Korean kitchen site showing varieties of korean foods and drinks. Developed a responsive react application with search/filter functionality.]. [Live Demo](#)

- **[ShopSphere E-Commerce Site]**

[A full e-commerce online shop with product management, shopping cart, checkout flow and automated email notification, built with Django]. [Live Demo](#)

- **My Portfolio**

[A designed responsive React portfolio site highlighting about me, skills, projects, resume and contact functionality]. [Live Demo](#)
